

Data Summary

The 2007 Industrial census (Basic information: municipal area) : Northeastern region

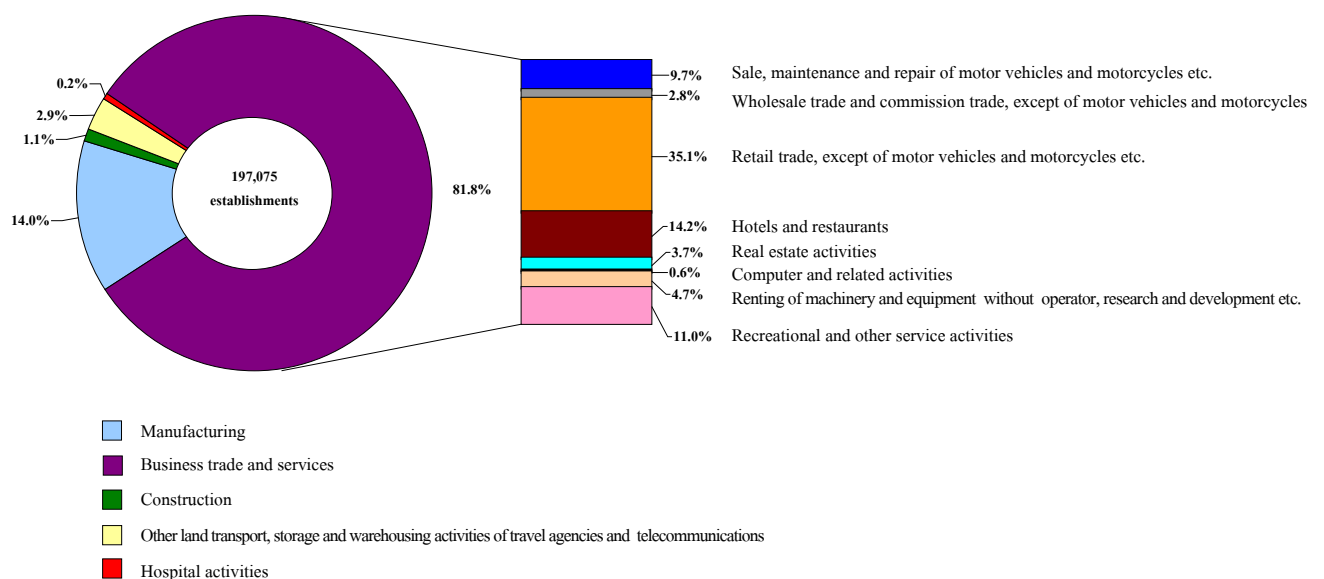

The National Statistical Office carried out the third Industrial Census in 2007, after having conducted the first one in 1964 and the second in 1997. According to the United Nations recommendation, the countries should conduct the census every 10 years to provide basic information on industrial continually. The main purpose of the 2007 Industrial Census is to collect the basic industrial information on industrial establishments with at least one person engaged or more located in non-municipal areas throughout the country. The information collected will be useful for formulating policy and industrial development plan as well as for decision making in both government and private sectors. In conducting the 2007 Industrial Census, the operational plan has been divided into 2 stages. The listing stage, which basic information of establishments engaged in all economic activities is collected. The enumeration stage, which detailed information of manufacturing establishments is collected.

This publication presents the results of the first stage which the data were establishments with at least one person engaged or more in municipal areas located in the **Northeastern region**. The main findings are as follows;
